REQUIREMENTS FOR A SWIMMING POOL PERMIT

1. Permit application, filled in and signed.
2. Swimming Pool information sheet, signed and dated.
3. Two copies of the residential survey or site plan indicating the following: distances from the property lines, buildings on the same property, driveway location, septic system and well locations, lot size and any wetlands, rivers, lakes or easements. Site plan must be approved by the Building Official. If the property lines cannot be determined, a survey will be required.
4. Stake the pool location.
5. Septic system location roped off.
6. SEPTIC SYSTEMS: Septic systems may need to be upgraded before a permit is issued. If you have any questions, please contact the Building Department.
7. Commercial Pools may have additional or different requirements.

SWIMMING POOL INFORMATION

A building permit is required for swimming pools exceeding a depth of 24 inches and/or exceeding a capacity 5,000 gallons.

Swimming pools are permitted subject to the following conditions:

- A. Swimming Pools shall be permitted only as an accessory use, on the same lot as, and intended for use by the occupants of, an accompanying residential unit or units.
- B. A building permit is required, except where specifically exempted by the current building code. Compliance with the Building Code is required.
- C. The property owner's application for a building permit shall include a site plan containing a drawing to scale showing: the type and size of pool, location of pool, location of house, garage, fencing and other improvements on the lot, location of structures on all adjacent lots, location of filter unit and pump, and indicating the type of such units, location of back-flush and drainage outlets, grading plan, finished elevations and final treatment (decking, landscaping, etc.) around pool, location of existing overhead or underground wiring, utility easements, trees and similar features, and location of any water heating unit.
- D. Provide the following setbacks:
 1. 20 feet from an in-ground swimming pool to a water supply well.

Revision Date: 6/2/2017

2. 20 feet from a septic system drainfield.
 3. 10 feet from a septic tank.
 4. 10 feet from any principal structure with frost footing, unless the pool is constructed entirely within the dwelling.
 5. 5 feet from structures without basements.
 6. The edge of the pool and its accessories shall be located no closer than 10 feet from any side or rear lot line, and may not extend into the minimum front yard setback. Pools cannot encroach into easements.
 7. A minimum of 10 feet is required between electrical wires and any point of a deck directly under the wires.
 8. Electrical wires shall be a minimum of 22.5 feet above the highest water level of the pool, tub or spa, or above a diving structure, observation stand, etc. to any overhead power lines. This minimum height is extended for a distance of 10 feet horizontally around the pool, spa or tub or above a diving structure, observation stand, etc.
- E. Pools shall not be located over underground utility lines of any type.
- F. Electrical Permit and Electrical Inspection are required for any electrical work.
- G. Pools shall not be located within any private or public utility, walkways, drainage or other easement.
- H. In the case of underground pools, the necessary precautions shall be taken during the construction to:
1. Avoid damage, hazards or inconvenience to adjacent or nearby property.
 2. Assure that proper care shall be taken in stockpiling excavated material to avoid erosion, dust or other infringements upon adjacent property.
 3. Install a temporary 4 foot high fence around the site. The fence shall be secured whenever construction has stopped, until a permanent fence is installed.
 4. All access for construction shall be over the owner's land and due care shall be taken to avoid damage to public streets and adjacent private or public property.
- I. To the extent feasible, back-flush water or water from pool drainage shall be directed onto the owner's property or into approved public drainage ways.
- J. The filter unit, pump, heating unit and any other noisemaking mechanical equipment should be located at least fifty (50) feet from any adjacent or nearby residential structure and not closer than ten (10) feet to any lot line.
- K. Lighting for the pool shall be shielded and directed toward the pool and not toward adjacent property.
- L. A structure or safety fencing of a non-climbable type at least 48 inches in height shall completely enclose the pool or yard area containing the pool.
- M. Gates must be self-closing, latching and lockable. The latching device shall be placed at the top of the gate or otherwise inaccessible to small children. Any other gate in the fence will be presumed to be solely for maintenance purposes and shall remain

locked at all times when not used for maintenance purposes. Each such maintenance gate shall be posted that the gate is to remain locked and is for maintenance purposes only.

- N. All fence posts shall be decay or corrosion resistant and shall be set in a concrete base or other suitable protection.
- O. The openings between the bottom of the fence and the ground or other surface shall not be more than four inches.
- P. Above-ground pools shall be equipped with a fence and gate system at all points of entry to the pool and meet the minimum height of 48 inch safety wall or fencing around the entire pool. Stairs must be removed when not in use. Such fence and gate system shall effectively control access to the pool and shall be constructed pursuant to the specifications listed in this section.
- Q. Water in the pool is to be maintained in a suitable manner to avoid health hazards of any type. Such water shall be subject to periodic inspection by the local health officer.
- R. All wiring, heating units, gas lines, grading, and installation of pipes and all other installations and construction shall be subject to permits and inspections.
- S. Except where otherwise noted, the following are specifically exempted from this section: Hot tubs or spas that accommodate no more than ten adults and have a locking cover.

I have read through all of the requirements to obtain a Swimming Pool Permit and agree to abide by all City Ordinances in regards to fencing, setbacks, up-keep, and placement of the swimming pool.
