## Cedar Creek Ecosystem Science Reserve

There is a small sign located at 2660 Fawn Lake Drive in East Bethel. In the 12 plus years I have lived here I have driven by that sign a hundred times and had no idea of how important or the kind of impact it has had on the world.

**Cedar Creek**  
Ecosystem Science Reserve  
UNIVERSITY OF MINNESOTA

Right here in our city is located what researchers around the world call “the modern birthplace of the Science of Ecology.” What started in 1942 with 500 acres has grown to 5600 plus square acres, around 8.75 square miles.

The name on the sign says The Cedar Creek Ecosystem Science Reserve, it is owned and operated by the University of Minnesota and is home to numerous long-term experiments that are literally helping the world. In 1975 our nation recognized this special place as a National Natural Landmark. Since the beginning, this property has been under the care of the best researchers, scientists and volunteers. The land has been kept and preserved wild and in the natural state, like Mother Nature herself lived there. It is home to 61 types of mammals and 291 different species of birds.

I write this article because I feel it's important to understand and recognize the value of past research and current long term research findings as we all live in a time of increasing concern for our global environment. Plus, as a resident here in East Bethel, they are our neighbor, as Cedar Creek itself touches many properties as it twists it way through East Bethel.

I recently attended an Open House Ground Breaking Ceremony and Trail Dedication with my wife Stacey, and not only was given a history lesson, but toured just a small piece of the reserve. We met painters, authors, song writers, researchers, teachers, students and professors who all find inspiration in the 5600 acres of pure nature.

I always knew East Bethel was a gem of a city, and like you, we moved to this area because of the rural country feel. What I didn't realize is how special this area is, and the impact their research is having on our world.

What I really enjoyed finding out is that there are trails open to not only residents of East Bethel but to the public to enjoy. There is no better time than the fall to take advantage of the changing colors these trails have to offer to truly appreciate what East Bethel looked like before we started to develop this area.

The Cedar Creek Ecosystem Science Reserve (CCESR) web page and Facebook page contain a ton of information. If you and your family want to enjoy a natural treasure or take part in many of the activities they offer, including star parties for those who enjoy star gazing, please check out their social media page. The history alone is a fascinating read which should help mold our decision about future developments as our city grows.

Hopefully the next time you drive by you will have a better understanding of the sign on Fawn Lake Drive. I think it's important to realize that we did not inherit this city we all call home from past generations; we actually are borrowing it from future generations of our children.

Please enjoy your day and city,

*Councilman Tim Miller*

## East Bethel Fire Department Auxiliary Breakfast

**SATURDAY, January 27**  
**8:00 — 11:00 AM**  
**East Bethel Fire Station #1**

Scrambled eggs with all the fixings! Meat, fruit, hash browns, dessert, coffee and juice.

Cost: \$8/adult, \$5/child (12 and under)

Fun extras! Silent auction, vendor fair, bake sale, helicopter landing (weather permitting)!

## City Summary Budget Statement By Mike Jeziorski, Finance Director

The purpose of this report is to provide summary 2024 budget information concerning the City of East Bethel to interested stakeholders. The budget is published in accordance with Minnesota Statutes Section 471.6965. This budget is in summary form: the complete budget may be examined at East Bethel City Hall, 2241 221st Avenue NE, East Bethel MN 55011 and on the City website. The City Council adopted this budget on December 11, 2023.

Governmental Funds 2024 Budget		
Budgeted Governmental Funds (General / Special Revenue / Debt Service)	2023 Budget	2024 Budget
<b>Revenues:</b>		
Property Taxes	6,303,300	6,426,800
Tax Increments	-	387,000
All Other Taxes	65,500	64,500
Special Assessments	25,000	24,000
Licenses and Permits	349,000	388,900
State General Purpose Aid (Market Value Credits / LGA)	5,000	5,000
State Categorical Aid (Street Aid / Fire Aid)	271,000	294,000
Grants from County (Recycling SCORE Funding)	66,100	66,100
Charges for Services	10,700	13,200
Fines and Forfeits	29,000	25,000
Interest on Investments	24,600	75,200
Miscellaneous (Refunds Reimbursements / Site Leases)	115,000	173,500
<b>Other Financing Sources</b>		
Transfers from Other Funds	288,000	286,000
<b>Total Revenues</b>	<b>7,552,200</b>	<b>8,229,200</b>
<b>Expenditures:</b>		
Current:		
General Government	1,208,500	1,266,400
General Government (Planning and Zoning)	298,300	184,900
Public Safety (Police / Fire)	2,213,500	2,510,700
Public Safety (Building Inspections)	374,100	385,400
Streets	1,046,300	1,076,600
Sanitation (Recycling)	68,200	68,200
Culture and Recreation (Park Maintenance / Civic Events)	526,100	540,700
Economic Development / Housing and Redevelopment Authority	14,300	405,600
Engineering / Unallocated Insurance / Miscellaneous	132,500	132,000
<b>Total Current Expenditures</b>	<b>5,881,800</b>	<b>6,570,500</b>
Debt Service - Principal	350,000	405,000
Interest and Fiscal Charges	525,000	512,500
Street Capital Outlay	500,000	550,000
Other Capital Outlay	150,000	150,000
<b>Total Expenditures</b>	<b>7,406,800</b>	<b>8,188,000</b>
<b>Other Financing Uses</b>		
Transfers to Other Funds	150,000	146,000

<b>Total Property Tax Levy - All Funds</b>	<b>6,303,300</b>	<b>6,426,800</b>

## Election Judges Needed!

The presidential primary, state primary and general elections are on the horizon. Election judges will be needed at all precincts. We will be hiring a team of judges for each of our three polling places for the presidential primary on March 5, the state primary election on August 13 and the general election on November 5.

Election judges are paid officials who staff local polling places, carry out election procedures, and make sure the rights of voters are protected. Judges will learn more about the election process, and along with their team, ensure that elections are administered in a fair manner:

- ◆ Minnesota State Law allows time off from work without loss of wages to serve as an election judge, as long as you provide a 20-day notice to your employer.
- ◆ Students who are at least 16 years of age may serve as trainee election judges.
- ◆ Election judges are required to attend a minimum of two hours of training, for which you will be paid.
- ◆ There is a need for judges who are comfortable and familiar with technology (iPads, etc.).

If you are interested in learning more about being an Election Judge or Trainee Election Judge, you can download our Election Judge Application/Information Update from the city website ([www.ci.east-bethel.mn.us](http://www.ci.east-bethel.mn.us)), or contact Carrie Frost, the East Bethel Elections Coordinator at 763-367-7853 or [carrie.frost@ci.east-bethel.mn.us](mailto:carrie.frost@ci.east-bethel.mn.us).

## Winter Garbage Cart Placement

Snowplow crews rely on residents' help to place garbage and recycling carts behind the curb when it is trash pick-up day. The City of East Bethel is reminding residents that carts placed in the street interfere with snowplowing operations and crews are unable to plow the streets from curb-to-curb.

- When you dig out your driveway, be sure to dig out a spot for your garbage can.
- Do not place garbage cans in the street. This creates a hazard as garbage cans could get hit by vehicles or snowplows. It is recommended that garbage cans be placed at least 2 feet off the edge of pavement into your driveway.
- Timing is everything. Putting your trash out the night before collection day can make life easier, but this puts your receptacle at risk of damage during nighttime snowplowing operations.
- Retrieve your garbage cans soon after collection. Garbage cans often sit at the roadside on collection day until the evening. Empty cans are vulnerable to winds and snow removal operations and could cause a hazard if knocked into the roadway.

## Snow Removal Reminder!

Just a reminder that activities such as plowing, blowing or shoveling snow onto or across public roads are prohibited by MN Statute 160.2715 and City Ordinance No. 124, Sec 70-2. This includes the ditch and right-of-way area along the roads. The snow can cause issues for motor vehicles, mail delivery, snow plowing, and garbage service.

Civil penalties may apply if the placement of snow creates a hazard, such as a slippery area, frozen rut or bump that contributes to a motor vehicle or pedestrian crash. The civil liability can extend to both the property owner and the person who placed the snow!

## City Snow and Ice Removal

Snowplow operators try to evenly distribute the snow along the route, but in some instances limited space can make this difficult. For safer streets and faster, more thorough service, our snowplow drivers urge you to remember:

- No Parking on any public street from November 1 to March 31 between the hours of 11:00 pm and 6:00 am.
- No Parking on any public street after a 2 inch snowfall, as determined by the Public Works Manager, between the hours of 6:00 am and 6:00 pm until the road has been plowed the full width.
- Keep a safe distance from the snowplow. They can weigh 17 times more than the average car and frequently back up.
- Think safely. Plan on traffic delays following a snowfall.
- Protect your kids! Remember it is dangerous for children to play in snow banks along city streets where snowplow operators are unable to see them.
- Do not place metal stakes, boulders, or permanent structures in the road right-of-way area (typically 33 feet from the center of the road on residential streets).
- Staking the curb line with temporary wooden lathe or fiberglass markers is acceptable and does make it easier for plow operators to distinguish the road edge under the blanket of new snow, however if snow banks grow too tall during the winter, crews may have to push them back which will knock over the markers so it is recommended to use something inexpensive.

## Tree Trimming

The Public Works Department will be working throughout the city this winter trimming and removing trees and brush along the public road right-of way (typically 33 feet from the center of the road on residential streets). The trimming is necessary to prevent branches from interfering with traveling vehicles and from blocking visibility. Some trees that are structurally unsound or too close to the roadway may need to be completely removed.

If you have any issues or need to report a public works related problem please call Nate Ayshford at 763-367-7876. We depend on and encourage your assistance in reporting any safety or maintenance matters and will respond to any of your comments or concerns in a timely manner. Thanks for all your help.

# Before the Snow: Mailbox Checklist

By Nate Ayshford, Public Works Manager

Now is a good time to check the construction and sturdiness of your mailbox prior to the snowplow season. Mailboxes can be especially vulnerable to damage from snow removal operations.

Keep in mind, the City does not assume liability for mailboxes damaged during normal plowing operations, including damage from discharged snow, unless it is determined the plow made direct contact with a mailbox meeting the installation requirements. Decorative and plastic mailboxes are not within the requirements and will not be replaced if damaged.

## RATING: POOR

- Not enough height or clearance
- Not sturdy and has obstacles around the mailbox post

## RATING: FAIR

- Not enough height and clearance
- Very brittle when cold

## RATING: GOOD

- Good clearance, sturdy
- Paper tube should be raised to height of mailbox

## RATING: BEST

- Good height and clearance
- Sturdy

When inspecting your mailbox, make sure it is installed so that the bottom edge is 45" to 48" above street level; with the post 20" back from the curb or front of the box. That amount of clearance is needed to keep the plow's wing from hitting the box. If there are any plastic newspaper tubes attached to the mailbox, they should be above 45" height requirement as well. Check to make sure the construction is stable enough to withstand the force of the wet snow and ice coming off of the wing of the snowplow.

# Keep Fire Hydrants Clear!

## Shovel after each snowfall

Residents and business owners are asked to please shovel out around the nearby fire hydrants after each snowfall. It is very important to keep hydrants clear of snow and visible from the street. This is so the firefighters can spend those precious seconds fighting fires and not clearing out hydrants.

# ACCAP Chores & More

The Chores & More program utilizes volunteers and paid independent contractors to assist seniors over the age of 60 in Anoka County. Through this program we are able to provide housekeeping services (laundry, vacuuming, sweeping floors, cleaning bathroom or kitchen) and chores services (heavy housework, washing windows and walls; basic home maintenance, yard work: mowing, trimming, snow removal). All services are based upon the availability of volunteers and workers. Call 763-783-4767

# Embrace the Spirit of Community: East Bethel Booster Day 2024

By Stephanie Dorn, Event Coordinator

In the heart of East Bethel, a vibrant community celebration is on the horizon - East Bethel Booster Day 2024! We invite you to join hands and make July 20, 2024, truly special by getting involved and supporting the festivities.

East Bethel Booster Day is not just an event; it's an embodiment of our shared history and the spirit that binds us together. It's a day when neighbors become friends, families come together, and the community thrives. By participating, you contribute to the rich tapestry of our city's identity.

## How Can You Get Involved?

**Volunteer Opportunities:** The backbone of any successful event is its volunteers. Whether you have a knack for organizing, love being in the midst of the action, or are skilled in specific areas, there's a place for you. Reach out to the organizing committee and discover how your talents can contribute to the success of East Bethel Booster Day.

## IN-KIND GIFTS

Whether it's equipment, supplies, or services, your contribution will directly contribute to our efforts and help us achieve our goals. Your support is immensely appreciated, and we look forward to the positive change we can create together..

**Sponsorship and Donations:** Businesses and individuals alike can play a crucial role by sponsoring or making donations. Your support can help cover costs, ensuring that the event remains accessible to everyone. Plus, it's an excellent way to showcase your commitment to the local community.

**Participate in Events:** From vendors to cornhole tournament to a talent show and live music, there's something for everyone during East Bethel Booster Day. Gather your family and friends, and participate in the festivities. Your active involvement adds to the energy of the day and creates lasting memories.

### VOLUNTEER COMMITTEE MEETING SCHEDULE

September 13th, 2023  
October 11th, 2023  
November 8th, 2023  
December 13th, 2023  
January 10th, 2024  
February 21st, 2024  
March 13th, 2024  
April 10th, 2024  
May 8th, 2024  
June 12th, 2024  
July 10th, 2024

Booster Day - July 20th, 2024

2nd Annual East Bethel Booster Day  
Double Elimination  
Cornhole Tournament

Learn more &  
Register!

East Bethel's  
got Talent

Learn more &  
Register!

Supporting local events fosters a sense of pride and belonging. It strengthens the ties that bind us as residents of East Bethel. Whether you're a long-time resident or new to the city, participating in Booster Day offers a chance to connect with your fellow community members.

East Bethel Booster Day is not just an event on the calendar; it's a celebration of who we are as a community. Your involvement, support, and enthusiasm will shape this day into a memorable experience for everyone. Let's come together, celebrate our city and its residents, and make East Bethel Booster Day 2024 an outstanding success.

# Prevent Your Septic System from Freezing

By Nick Schmitz, Building Official

A winter of cold temperatures and little snow cover can cause freezing of onsite systems. Even in a normal Minnesota winter, freezing can occasionally be a problem. Identifying and correcting a potential freezing problem is far easier than dealing with a frozen system. Here are a few common causes of onsite system freeze-ups.

**Lack of Snow Cover:** Snow serves as an insulating blanket over the septic tank(s) and soil treatment area (trenches, drainfield or mound). Lack of snow allows frost to go deeper into the ground, potentially freezing the system.

**Compacted Snow:** Compacted snow will not insulate as well as uncompacted snow. Driving any type of equipment over the system compacts snow and sends the frost down deeper. Automobiles, snowmobiles, ATV's, foot-traffic, and livestock should stay off the system all year long but especially in the winter.

**Lack of Plant Cover:** This often occurs in new systems installed late in the year where a vegetative cover could not be established before winter. The vegetative cover insulates the system and helps hold snow.

**Irregular Use of System:** When homes or cabins are unoccupied for long weekends or extended periods of time, no sewage is entering the system to maintain sufficient temperatures to avoid freezing. Low usage may not be sufficient to keep the system from freezing. Frequent use, warmer water temperatures and greater water use are all important in cold temperature.

**Leaking Plumbing Fixtures and Furnace Drips:** When a fixture such as a toilet or showerhead leaks, it sends a small trickle of water to the system. The slow moving water or drips can freeze within the pipe and eventually cause the pipe to freeze solid. Appliances such as high efficiency furnaces and humidifiers can also cause water to freeze in the pipes due to the small amount they discharge.

**Pipes Not Draining Properly:** A common cause of freeze-ups are sewer pipes and pump lines that are not installed with proper fall (change of elevation), or pipes that settle or sag after installation. Any time a dip or low spot occurs in a pipe, sewage can collect and freeze.

**Cold Air Entering the System:** Open, broken and uncapped riser or inspection pipes and manhole covers allow cold air into the system and can cause the system to freeze.

**Water Logged System:** If a system was hydraulically failing (water coming to surface or seeping out the side of a mound) it is a prime candidate to freeze. This effluent will freeze and prevent further effluent from entering the soil.

## What Should You Do If Your Onsite System Freezes?

If your septic system is frozen, your first step is to call an onsite professional. Unless the cause of freezing is corrected the system will refreeze next winter. If you have a pump and hear water constantly running in a pump tank (a possible indication of a frozen system) shut off your pump and call an onsite professional. This will likely be a pumper or an installer who can help determine the cause of the problem and offer solutions. The University of Minnesota Onsite Program web site is one place to go to locate a professional. Many pumpers and installers have devices called steamers and high-pressure jetters to try to unfreeze system piping.

Other methods used to help fix a freezing problem include adding heat tape and tank heaters. Cameras can be sent down the pipes to determine where the freezing is occurring and if repairs are needed. If it is not feasible to correct the problem or equipment is not available in your area, the only other option is to use the septic tank(s) in the system as a holding tank until the system thaws naturally. You will need to contact a pumper who will empty out the tanks when they are full on a regular basis. This can be very costly, especially with normal volumes of water use (50 to 75 gallons per person per day). Reduce water use by limiting the number of toilet flushes, taking short showers, using the dishwasher at full capacity, limiting running water to get hot or cold and doing laundry at a laundromat. It is smart to find the cause of the freezing problem so that it can be addressed in the spring, preventing future freeze-ups. Then preventative measures can be added to the system such as adding insulation around the tank and pipes or adding additional cover. There are many misconceptions about how to deal with a frozen onsite system.

- Do NOT add anti-freeze, salt or a septic system additive into the system.
- Do NOT pump sewage onto the ground surface.
- Do NOT start a fire over the system to attempt to thaw it out.
- Do NOT run water continually to try to unfreeze the system.

## What Can You Do to Prevent Your Onsite System from Freezing in the Future?

Depending on your system, location, and water use, you may never have a freezing problem. However, there are several steps that you can take if you are concerned about your onsite system freezing. Here are some precautions if you have had a past problem or are concerned about having a future problem. It is not necessary to do all of these, but you may pick and choose based on your situation:

1. Place a layer of mulch (6 -12 inches) over the pipes, tank and soil treatment system to provide extra insulation. This mulch could be straw, leaves, hay or any other loose material that will not compact and stay in place. This is particularly important if you have had a new system installed late in the year and no vegetative cover has been established. If your system is currently frozen ignore this step, as it will delay thawing come spring.
2. Let the grass get a little longer in the late summer/fall over the tank and soil treatment area. This will provide extra insulation and help hold any snow that may fall.
3. Use water; the warmer the better if you feel the system is starting to freeze. If freezing is a concern, increasing low use to a normal water use can help the system. This includes spreading out your laundry schedule to possibly doing one warm/hot load per day, using your dishwasher and maybe even taking a hot bath. DO NOT leave water running all the time, as this will hydraulically overload the system.
4. If you know you are going to be gone for an extended period, plan accordingly. This could include having someone use sufficient quantities of water in the home regularly or pumping out your tank before leaving. If you live in an area with a high water

Continued on next page...

# Septic system repair & replacement grants

- ✓ Homesteaded single family homes or duplexes in Anoka Co.
- ✓ Must have been inspected and issued a certificate of non-compliance.
- ✓ May NOT be used for tank pumping or other maintenance.
- ✓ Household must meet low income thresholds. Grant covers up to 90% depending on income.
- ✓ Funding is limited and may vary by location. Shoreland areas or projects providing the greatest health and environmental benefits may be preferentially funded.
- ✓ See all program requirements at [www.AnokaSWCD.org](http://www.AnokaSWCD.org) under "financial assistance."

Contact Kris Larson at the Anoka Conservation District.  
763-434-2030 ext 210 or [kris.larson@anokaswcd.org](mailto:kris.larson@anokaswcd.org)

Continued from page 6...

table, you should only pump out the tank if the tank was designed for high water table conditions. If a tank is left full for several winter months, the sewage will get very cold in shallow tanks and can even freeze. If you then return home before temperatures start to rise, the effluent leaving the tank will be cold. By starting with an empty tank, you can then start fresh with warm effluent. If you use a cabin on a limited basis during the winter months, this may be a good idea as well.

5. Fix any leaky plumbing fixtures or appliances in your home. This will help prevent freezing problems and help your system work better year round.
6. While on vacation have someone come by and run warm water for a while.
7. Keep all types of vehicles and high traffic off of the system. This is a good rule to follow year round.
8. Make sure all risers; inspections pipes and manholes have covers on them. Sealing them and adding insulation is a good idea. Insulation may be added during construction particularly if the top of the septic tank is within 2 feet from the surface.
9. Keep an eye on your system. If any seeping or ponding occurs contact an onsite professional to help determine the cause and remedy.
10. Add more insulation to your system. This could include replacing pipe with insulated pipe, adding foam insulation over septic tanks or adding more soil cover.

Remember to take care of your septic system so you do not have any problems.
